

## Project

BUTTERFLY - Biomass Utilized To The Extended portfolio of Renewable Fuels with Large Yields is a Horizon Europe Innovation Action project, aiming to develop an innovative, flexible and efficient coproduction of clean fuels from waste and residual feedstocks and for the hard-to-decarbonize sectors.

The project started on 1st July 2023 and will continue through 30 November 2026.

Funded by  
the European Union

This project has received funding from the European Union's Horizon Europe Research and Innovation Programme under Grant Agreement No. 101118241.

# BUTTERFLY

Flexible and efficient coproduction of clean fuels for hard-to-decarbonize sectors

## The goals

Produce advanced biofuels and renewable fuels from waste and residual feedstock

Demonstrate an innovative, efficient and flexible coproduction process

Assess sustainability, define new value chains and business cases

## The impact

BUTTERFLY circular value chains enable waste and residual streams valorisation, contributing to the climate-neutral energy priorities of the European Union.

## BUTTERFLY value chain
